Test Architect with **15 years** of expertise in test automation, DevOps across **Aviation , Retail , Banking , Telecom , Healthcare ,** and **Media** domains. Proficient in **Selenium , Appium ,** Playwright, **Java ,** and **REST** API automation. Experienced in implementing various **design patterns ,** creating **test metrics ,** and designing scalable **automation frameworks** and **CI/CD** integration with Jenkins, AWS Codepipeline, Azure DevOps.

Professional Summary

- 15 years of extensive experience in Automation Testing and DevOps, specializing in **Selenium WebDriver, Appium, Playwright, Jenkins,** and AWS.
- Designed and developed robust test automation frameworks from scratch.
- Expertise in building and managing CI/CD pipelines using Git, Bitbucket, Jenkins, and Azure DevOps.
- Strong proficiency in automating RESTful and SOAP Web Services, enhancing test coverage and efficiency.
- Skilled in developing **Data-Driven, Keyword-Driven,** and **Hybrid test automation frameworks** with **TestNG** and **Maven.**
- Implemented **Selenium Grid** for remote browser execution and TestNG for **parallel test execution,** reducing overall testing time.
- Advanced experience in mobile application automation on both **Android** and **iOS** platforms using Appium.
- Experienced in Mobile testing of both web and native applications.
- Proficient in **Java** with a focus on writing generic and project-specific scripts to optimize automation processes.
- Comprehensive understanding of all stages of the Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC).
- Conducted various types of testing, including Smoke, Component, Integration, System, Regression, and Compatibility Testing.
- Adept in creating and executing test cases in **SOAPUI** for comprehensive Web Services testing.
- Experienced in Bug Tracking and Issue Management using **JIRA,** ensuring effective defect tracking and resolution.
- Demonstrated ability to manage multiple projects concurrently, maintaining high standards of quality and on-time delivery.
- Led and supervised testing teams, providing guidance and ensuring adherence to best practices across multiple projects.

- Active participant in client kick-off meetings, gathering requirements, and contributing to project planning and test estimations.
- Strong analytical skills in understanding and interpreting application requirements and functional specifications.
- Experience in reviewing and enhancing manual test cases to align with best practices and project requirements.
- Collaborated in defect review meetings to prioritize and resolve issues effectively.
- Knowledgeable in containerization using **Docker**, enhancing the scalability and deployment process of test environments.
- Proficient in using version control tools like Git for source code management and collaboration.
- Experience in performance testing using tools like **JMeter** and **Locust**, ensuring application stability under load.

Skills

Languages: JAVA, Python, JavaScript

CI Tools: Jenkins, Azure DevOps

UI Automation Testing: Selenium Suite (WebDriver & Grid), Protractor, TestNG, XPATH, AutoIt

Mobile App Automation: Appium

Web Services Automation: REST Assured, SOAPUI

Performance Testing Tools: Jmeter, Locust

Build Tool: Maven, Gradle

Containerization Tool: Docker

Version Control: GitHub, GitLab, BitBucket

Methodologies: Agile, Waterfall, Kanban

Databases: MySQL, Postgres, Oracle

Work History

2025-03 -

Current

Software Engineer in Test

Fidelity Investments, Dallas, United States

2024-08 - 2025-

01

Principal Consultant

Xebia USA Inc, Atlanta, GA

2015-03 - 2024-

07

Principal Consultant

Xebia IT Architects, Bangalore, India

2012-10 - 2015-

02

Senior Software Test Engineer

Trivium ESolutions Private, Bangalore, India

2010-07 - 2012-

07

Test Engineer

Blue Lotus Software Solutions Pvt Ltd, Hyderabad, India

Education

2005-09 - 20091

Bachelor of Technology: Electronics And Communications Engineering

Jawaharlal Nehru Technological University - Kakinada

Certifications

2024-08

AWS Certified Cloud Practitioner

2011-02

ISTQB Foundation Level Certification

Projects

Self-Service Bag Drop

Client: Delta Airlines, USA | **Domain:** Airlines | **Role:** Test Architect

Test Tools Used: Java, RestAssured, Serenity BDD, Cucumber, AWS Code Pipeline, Maven

Description: Suite of APIs for retrieving and updating passenger baggage information.

Responsibilities:

- Architected a custom automation framework using Serenity BDD and RestAssured.
- Collaborated with cross-functional teams to define API dependencies and testing scope.
- Enabled automation adoption within the team, improving productivity and processes.
- Established and enforced DoD and end-to-end testing standards.
- Managed automated test pipelines in AWS CodePipeline for CI/CD integration.
- Created UAT test plans, executed test cases, and tracked issue resolution.

Store Colleague Experience (SCE)

Client: TESCO, UK | **Domain:** Retail | **Role:** Test Architect

Test Tools Used: Java, Selenium, Appium, RestAssured, TestNG, Cucumber, Azure DevOps, Jenkins, Maven

Description: Mobile, Web apps & API suite enabling store managers and staff to track stock, imports, discounts, and wastage efficiently.

Responsibilities:

- Developed a hybrid test automation framework with reusable utilities for multiple teams.
- Automated Functional, Regression, and API testing using Appium, RestAssured, and Cucumber.
- Built a Playwright-based test automation framework with Java and integrated it into CI/CD pipelines.
- Configured Jenkins for scheduled test execution, ensuring continuous test coverage.
- Collaborated with clients on requirements, sprint planning, and test estimations.

- Designed and executed test cases for mobile apps and backend APIs.
- Led UAT execution, coordinating with end-users and validating defect fixes.
- Managed defect tracking and test case reviews using JIRA.
- Actively engaged in Agile ceremonies, ensuring alignment between development and testing teams.

Quality Assurance Audit

Client: HARMAN | **Domain:** Automotive | **Role:** Software Quality Assurance Auditor

Description: Conducted a comprehensive QA audit to evaluate software testing processes, identify risks, and recommend improvements for enhanced quality and compliance.

Responsibilities:

- Assessed manual and automated testing practices, identifying strengths and gaps.
- Evaluated Selenium with Java usage and its impact on test coverage and efficiency.
- Analyzed Jenkins integration for CI/CD effectiveness and workflow optimization.
- Reviewed Agile adherence, recommending process enhancements for better alignment.
- Collaborated with teams to address testing challenges and implement best practices.
- Led workshops on testing methodologies, automation tools, and Agile/DevOps.
- Provided strategic recommendations to improve testing efficiency and automation.
- Delivered a detailed audit report with key findings and a roadmap for improvements.

InsideRX

Client: Express Scripts, USA | **Domain:** Pharmacy | **Role:** Test Automation Expert

Test Tools Used: Java, Selenium, Appium, TestNG, Jenkins, Maven

Description: Pharmacy aggregator platform enabling online purchases at discounted prices via web and mobile applications.

Responsibilities:

- Developed a test automation framework using Appium, Selenium, and TestNG.
- Automated testing across web and mobile apps, ensuring seamless functionality.
- Executed tests on cloud devices via TestDroid for broad device coverage.
- Built and managed CI pipelines in Jenkins for continuous testing and delivery.

Chicago Tribune

Client: Tribune Publications, USA | **Domain:** News Media | **Role:** Test Automation Engineer

Test Tools Used: Java, Selenium WebDriver, Selenium Grid, Appium, TestNG, Jenkins, Maven

Description: Automated test cases for an online newspaper edition using a Keyword-Driven Framework.

Responsibilities:

- Performed Functional and Regression Testing using Selenium & Appium.
- Implemented a Keyword-Driven Framework with TestNG & Maven.
- Enabled remote browser execution with Selenium Grid and parallel execution via TestNG.
- Executed Appium test cases on Chrome using TestDroid cloud devices.
- Configured and scheduled Jenkins jobs for automated test execution.
- Participated in client kick-off meetings and requirement gathering.
- Developed runtime TestNG XML files for optimized parallel execution.
- Designed Image comparison functions
- Conducted browser-based testing and managed defects using JIRA.
